Descripción

En la primera mitad del curso cubriremos algunas ideas centrales en la literatura de Economía Política. Comenzaremos discutiendo la naturaleza del poder político, diferentes tipos de instituciones políticas -democracias, autocracias-, y procesos de cambio institucional como democratizaciones, y revoluciones. Estudiaremos las consecuencias económicas y sociales de la democracia, problemas de agencia centrales en la arena política, la naturaleza de la corrupción, el problema de acción colectiva y la creación de capacidad estatal.

La segunda mitad del curso se concentrará en examinar un componente básico de la democracia: las elecciones. En particular, estudiaremos cómo y bajo qué condiciones, las elecciones permiten la selección de buenos líderes y crean incentivos en los políticos de seguir los intereses de sus electores. La información disponible sobre los candidatos por los votantes, arreglos institucionales como la reelección, y la manera en que los votantes evalúan el desempeño de los políticos, recibirán especial atención. Hacia el final del curso exploraremos la forma en que las reglas electorales se rompen y las consecuencias que esto trae a la democracia.

Evaluación

Al final del curso los estudiantes tomarán un examen con el que se evaluará la comprensión de las lecturas cubiertas en el curso. El examen constituye 70% de la nota final. El 30% restante será asignado de acuerdo a la participación en clase de los estudiantes.

Organización

El curso será dictado en doce sesiones de tres horas y media cada una.
